

To Protect the Health of Our Livestock

A. Interstate Livestock Entry Permit. Prior to entering California, a permit from the Animal Health Branch, valid for 15 days, is required for:

- All intact female cattle
- Beef bulls over 18 months of age
- Dairy bulls over 6 months of age
- Breeding cattle from less than tuberculosis "Accredited Free" states

The owner's name, physical address and telephone number are required. Call 916-651-6278 for permits.

B. Certificate of Veterinary Inspection (CVI). A CVI is required for:

- Female dairy cattle over 4 months of age
- Female beef cattle over 6 months of age
- Beef bulls over 18 months of age
- Dairy bulls over 6 months of age
- Any animal requiring an official test.

C. Official Identification. All cattle moving with a CVI require official identification on the certificate using either:

- Official brucellosis calfhood vaccination tag
- State or federal approved tag
- "Premises Identification Number" tattoos
- Registration tattoos
- Any other device approved for use by CDFA or USDA
- Registered brands may be substituted for official identification under certain circumstances.

D. Official Brucellosis Calfhood Vaccination. Brucellosis vaccination, indicated by a legible tattoo is required for:

- Female dairy breed cattle over 4 months of age
- Female beef breed cattle over 12 months of age and requested over 6 months of age

E. Brucellosis Test. All sexually intact cattle over 18 months of age (or that have calved) from "non-class free" states require a negative blood test within 30 days of entry and individual identification on official forms.

Exceptions: Cattle originating in Certified Free Herds when the herd number and date of last negative whole herd test are recorded on the CVI.

F. Trichomonosis Test. Bulls over 18 months of age require a negative trichomonosis test sample collected 10 days after last contact with sexually mature cows and within 30 days prior to entry into California.

Exceptions:

- Bulls for exhibition, confined to location
- Bulls for artificial insemination

G. Tuberculosis Test. All dairy breeding cattle over 6 months of age from any state require a negative TB test within 60 days prior to entry into California. All beef breeding cattle over 6 months of age originating from any "non-class free" state require a negative TB test within 60 days prior to entry. Please contact Animal Health Branch for cattle coming from Michigan.

Exceptions:

- Dairy heifers originating in and returning to California on a special permit
- Cattle from Accredited Free Herds when the herd number and date of last negative whole herd test are recorded on the CVI.
